

Agent # 759

Thursday - 7100-1377

Special Warr.

Reported for Warr. at 7:00 am and Warr.ed till 6:00 pm. I wish to correct a mistake I made in Tuesday's Report. I stated that the readers down stairs on the "Big" loom ran 18. They only ran 16. I happened to see 18 - and thought all of them did but I have learned since then that most of the readers ran 16 looms.

The man I promised to tell you his name - who said he would like to play the Dismute under the mill - his name is J. Walter Stover and he is wearing a notice to go to the Hillside Mill on Lagrange Ga.

The loom fixer I mentioned in the Tuesday's Report has been spending a lot of his time in the Waterhouse a gain to day reading his name is Henderson. Sic # 5 - he spent at least 45 minutes in the Dressing Room reading during Warr. hours to day at one time and I loaned over his job, and counted four plays up and him reading. One of my worms was out of by Warr.ing an Suply - Suply man brought it, and it was left on bench for

2

half hour. Still reading that dont
message the readers any. especially
when the boom are out of fix ed
dead as they are down stairs some
bunch of fixers they have. all are
amateurs. no experts at all. F B - C M
usually have the best boom fixers
Why dont they now. there is a
mighty good one now as ever?

Buice section # 6 is
a good fixer. thats all down stairs
the second hand down stairs
does not do any more than he can
possibly get by with he is the first
to get ready to go at stopping time
and the last to repark at starting
time he is under an hand in
the mornings to help the cursor start
up. since they have passed the
rule for the boom fixers to cut
out going to now 30 minutes before stop-
-ping time they dont start up any
more so Bides the cursor has it
to do as let the readers do it. I
had a boom to make a bracket this
morning. stood for 2 hours. Flagg
it after the breakfast was drunk in
and Hadcock came and turned on
it. and he had no more than
got home to have lunch when

3

it made another twice as large -
As the first stood over 7 hours more
and the loom is still out of fix
loom # 251. Half of the looms in
the department I am in make this
place. The thin place pedlars don't
Warr. When they do. The readers -
Start up from I and do pay any
Attention to it. Why use the pedlars
at all?

Ben Elrod, the Boat Logger
told me at noon he haught a supply
of liquor. and one gallon of it was
half way run. he said he paid
it out. I of course that's where
he would not have paid it out
if he had known it contained
half bad alcohol. Ed Michals has -
Recovered from his injuries in the
Wilson Hotel fire and is downy
business at the same old stand.
Charlie Emory Barber Shop on Carroll
Street. he went a harrier you know
but a whissing pedlar. that's the
hang out of Ed Corneel. Ed Michals
and a one eyed guy named Hill
and Charlie Emory is the King leader
of the police, and that's what they
want a damn they would break
up that joint.
