Special work.

I reported at the mill this morning @ 20, A.M. #1 mill #3 room I run 12 looms in middle alley on #4 and #5 sections, one of the numbers of my loom was 249.

on the said looms I found five threads running out and many drop wires pulled out of place so they wouldnt stop the loom when a thread broke. I also found a big part of the threads crossed between the leece rods and harness, a plain loom weaver had run the said looms several weeks up to Saturday. I showed the Boss weaver how the threads had been crossed between leece rods and harness, he says they should be leeced again. I says I have told both fixers and the secondhand about it and the secondhand said if he couldnt get some one to leece them he would leece them his self.

The Boss weaver skiped about in spots and looked over cloth

The Secondhand was very busy on different things but I did not

see him look over his cloth.  
Mr Bagwell the Supt was in the room twice and saw a new temple put on which has not proved to be any better than the old temples. I saw the weaver having trouble with the selvage where the new temple was put on I ask the weaver how it run, he says not any better than the others.

The Assistant Supt passed through one time.

8 windows were open on west side all day. there wasent any open on east side.

Work run very good but there is still room for it to run better. I saw two weavers asleep Boss weaver caught one and gave him a good talking.

I inclose a Laundry slip which I received with my Laundry which only weighed  $1\frac{3}{4}$  pounds they have it on the slip 4 pounds Miss Clark the fore lady says 4 pounds is right but I will knock some off on your next Laundry.
